Anesthesia Consent Form

Bloodwork, Fluids, and Microchip

BLOODWORK OPTIONS:

These tests can identify hidden health problems. They can detect congenital and age-related diseases, which may compromise your pet while under anesthesia.

_____ **Comprehensive Plus Profile** - A comprehensive 15 point check which evaluates your pet's hydration status and markers for diabetes, kidney and liver disease, and anemia. This includes a CBC, which evaluates markers for infection, bone marrow and bleeding disorders. **\$150.00**

_____ **Comprehensive Profile** - A comprehensive 15 point check which evaluates your pet's hydration status and markers for diabetes, kidney and liver disease, and anemia. This does not include a CBC. **\$113.00**

_____ **Mini Profile** - A minimal 7 point check that screens for signs of diabetes, kidney and liver disease, dehydration and anemia. **\$82.00**

_____ (Signature)

FLUIDS OPTIONS:

_____ **IV Catheter with IV Fluids** - Provides excellent hydration while your pet is under anesthesia and quick venous access in the vent of an emergency. **\$98.00**

_____ **SQ Fluids** - Provides hydration and a more comfortable anesthetic recovery. **\$26.00-\$36.00**

_____ (Signature)

MICROCHIP OPTIONS:

_____ In the event that your pet is lost, a microchip offers quick identification at various animal hospitals and shelters so that you can be easily reunited. (Registration Included)

\$76.00
